7 LONGEST STREAK IS 6!

Must place a \$5 Progressive wager to be eligible. Only the highest payout is paid per hand once the streak has ended. The streak length is based on the number of spins in an ascending direction after the wager is placed. 00 is greater than 0 and less than 1. All winning players split the jackpot. Each winning player receives a fixed pay. Progressive wagers are not returned.

GALAXY GAMING

An exciting addition to Roulette, played every round!

Roulette Up is an optional progressive wager for Roulette games. Players wager that the numbers spun will be in an increasing sequence. The wagers are paid based on the streak length (amount of consecutive spins of increasing numbers) once the streak ends.

- The first spin establishes the starting number and the wager is active for as long as each subsequent spin lands on a greater number than the previous spin.
- The higher the streak, the higher the pay.
- Can be played on single, double & triple zero Roulette.
- Each player has their own specific sensor designated by their chip color.

Digital Tracker

Roulette Up Progressive, powered by Galaxy Operating System, features the innovative Digital Tracker. The interactive TableVision tracks all wagers simultaneously without requiring lammers. Players can see each wager's streak length and best of all, players can wager every round!
